Introduction

Eve Sánchez Silver
Medical Research Analyst
Executive Director
Cinta Latina Research
silver@cintalatina.org
www.cintalatina.org

**She just turned 5.
I'm not ready to tell her about
breast cancer.
She just found out my breasts
are not really pillows.**

Breasts are important

- Breast Cancer is a very personal thing
 - It fractures your femininity
 - It shatters self-image
 - It is the destroyer of “self” as you know yourself to be
- Breast Cancer is the destroyer of worlds

5 Medical Groups Affirm...

- Abortion **is** One of the Causes of Breast Cancer

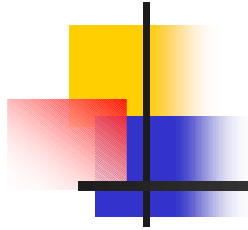

Breast Cancer notes:

- Most women with breast cancer never had an abortion
- No one knows all the factors which initiate breast cancer for sure
- Prevention of breast cancer is not yet an option
- However, prevention of abortion **is**

Outline

- The Susan G. Komen Breast Cancer Foundation's financial affair with Planned Parenthood
- “PINK Money” is \$\$\$ steering the women's health community away from the truth?
- The Abortion-Breast Cancer link
- Early vs. Late Reproduction Issues

Susan G. Komen Breast Cancer Foundation

Midwest Story

- **Allegation:**

- **Iowa woman claims SGK is funding PP**

Friday May 21, 2004, Davenport, IA; Rachelle Treiber, Quad-City Times

- **Action:** Bald woman gives up her wig at public SGK meeting (Joan Archer)

- **Report:**

riccocheted news e-mails arrive

- Questions abound

- ★ I ask around at SGK:

- Could this be true?**

- Is it possible that SGK is funding PP?**

RUMOR: Is SGK Funding Planned Parenthood?

- **YES! The ‘rumor’ was true:**
 - In 2003 \$38.4 M
 - ★ 21 **SGK** affiliate grants
 - totaling **\$475,000+**
 - ★ went to **Planned Parenthood** (Kristen Kelly, SGK Public Relations)
- By the way...

DID YOU KNOW?

Between years **1987 - 1999**

YOU,

*and the rest of
the American taxpayers
have contributed*

\$1.81 Billion

to **Planned Parenthood**

Your Tax \$\$\$ Hard at Work

SERIOUS TIES

- Nancy Brinker, SGK Founder:
 - 2002 on Advisory Council of No. Texas PP
 - ★ THE FOLLOWING YEAR:
 - 2003 SGK awards **\$475,000** in 21 affiliate grants to Planned Parenthood
 - In 2003 No. Texas builds new PP facility:
Cost: **\$5,000,000.00**
 - Is there a conflict of interest here?

Planned Parenthood's Founder Margaret Sanger

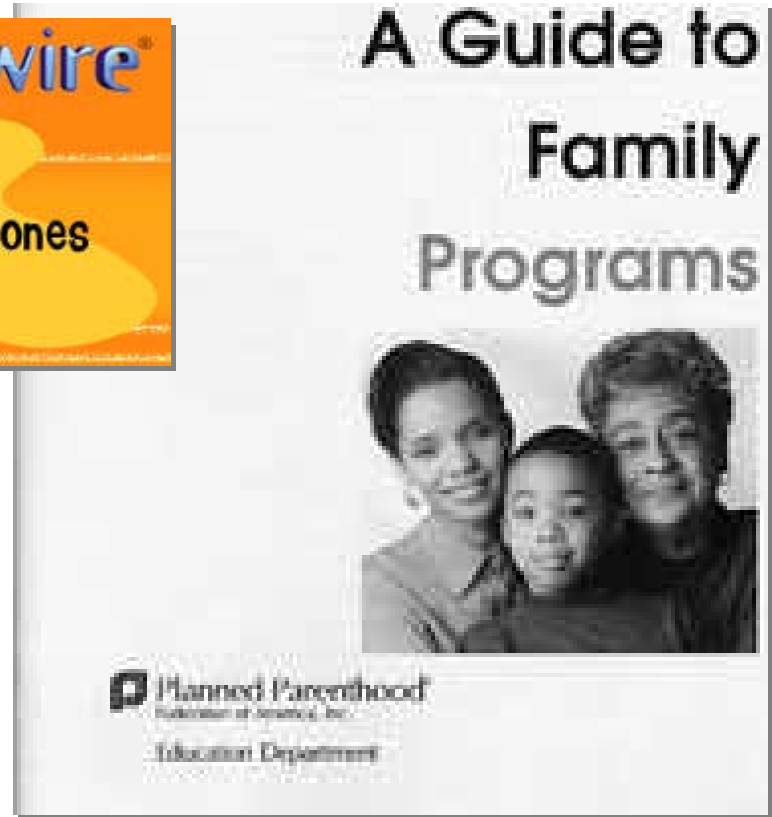

- **Eugenicist:** "Today eugenics is suggested by the most diverse minds as the most adequate and thorough avenue to the solution of racial, political and social problems. (*-- Margaret Sanger. "The Eugenic Value of Birth Control Propaganda"*) (*Birth Control Review*, Oct. 1921, p.5)
- In April of 1932 [Sanger] advocated an option:
"to give certain dysgenic groups in our population their choice of segregation [concentration camps] or sterilization."
(*"A Plan For Peace," Birth Control Review*)

People of Color remain the very focus of Planned Parenthood

...as are children

Margaret Sanger's program of death:

- **BIRTH CONTROL PILLS:**
 - Higher doses of estrogen with longer, intensive exposure
- **ABORTION: A-BC Link, destruction of child**
- **BREAST CANCER: Destruction of mother**

Partial Birth Abortion:

Margaret Sanger's program of death
is

STILL Right on Track

Intolerable Discovery

- Spoke in person with Komen officials
- Resigned as charter member of the National Hispanic/Latina Advisory Council, speaker and reviewer
- Gave SGK my **Final Advisory...**

“Disassociate from PP”

“...It is my final advisory to The Susan G. Komen Breast Cancer Foundation that it **withdraw its continued financial support to Planned Parenthood**, a multi-million dollar international institution which is systematically focused upon the abortion and the destruction of life.

“The multi-cultural nature of our councils makes **our people the very focus of that destruction.**”

“I cannot sit idly by.”

SGK responds that their \$\$\$ is helping women get breast services

- ***“Planned Parenthood is often the only breast service provider for rural women and women of under-served areas.”***
- SGK funding has, ostensibly provided \$\$\$ to increase services to
 - Women in rural areas
 - Women of under-served areas

So... breast services are UP at PP RIGHT?

- Planned Parenthood's breast services are **DOWN**: (according to the most recent Ryan Report)
- PP services **between 2002 and 2003**
 - abortions **increased** by **14,000**, while
 - breast exams **decreased** by more than
141,000

Other PP targets...

- “Word... that one of the real options being considered by Planned Parenthood is the possibility of providing abortions in places **where federal laws don't apply**. Some of the places it has identified are:
 - **Native American reservations**
 - Ships offshore (such as the Women on the Waves initiative)
 - Setting up abortuaries along the border in Canada where abortion is legal” (Ryan Report Nov. 2004)

PAID FOR WITH YOUR TAX MONEY

PP has money to burn...

- **Planned Parenthood** is characterized as one of the wealthiest US organizations
 - earning **\$ 216M** in 2004 NY Times
 - ★ government entitlements
 - ★ private donations
- **Planned Parenthood** is the largest provider of BC/pills and abortions in the Nation

Why are these women running?

“I RACE for the Cure:

- For my sister
- My mother
- My friend”

Planned Parenthood’s newest position:
A Kinder, Gentler Murderer

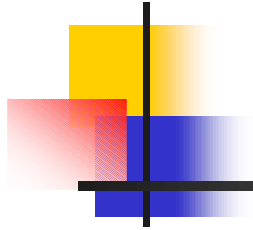

- “Nobody WANTS abortion”
- Focus on contraception...

SGK denies A-BC link

- SGK's supposed adherence to *following the scientific data where ever it leads* is a feint
- **When the scientific evidence disagreed with their political agenda, they chose to follow their political agenda**
- SGKs concern for the health of women is now parallel to PP's concern for the health of the children that they abort
- PP is not in the business of saving lives
 - It is in the business of Killing People
- **SGK has chosen** to align themselves with them and their objective

“PINK MONEY”

Is SGK in cahoots with PP?

Is one hand washing the other?

“Never let a mortician take your pulse”.

E.David Silver

Deputy Attorney General

New Jersey

The Pink Money Cycle

- You give to **SGK**
- **SGK** gives to **PP**
- **PP** murders children
- Abortion is a cause of breast cancer
- Breast cancer keeps **SGK** in business
- Women die of breast cancer
- We give **SGK** more money

Pink Money Organizations

- Any organization for whom the abortion/breast cancer connection is financially useful or politically expedient
- ANY organization that stands to benefit from the A-BC information blackout

The “Pink Money” Organizations are not immediately obvious

- **SGK** - funds PP
- **PP**- supplies birth control & abortions
- **American Cancer Society** - Withdrew its info on the A-BC link
- **NCI** - Recognizes no significant link between abortion and breast cancer
 - In 1928 first study on lung cancer /smoking link from England
 - NCI finally admitted it **might be true** in the **1950's**
- **Dying women do not have time for NCI to catch up with the facts**

“Pink Money” Orgs.

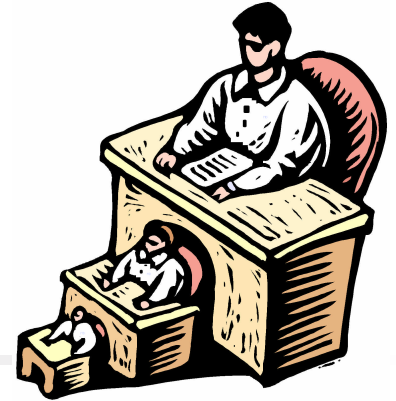

- **Pharmaceutical Companies** - The Pill...
 - Listed in textbooks as causing **breast cancer**
 - The patch: **multiple deaths** reported
 - ★ Young woman dropped dead from **embolism** on NY sub
 - ★ Pharmacist's wife dropped dead from **embolism**
 - **Two kids 8 and 5**
 - ★ **High number of deaths due to emboli**
(blood clots) in 2 yrs

The FDA reports:

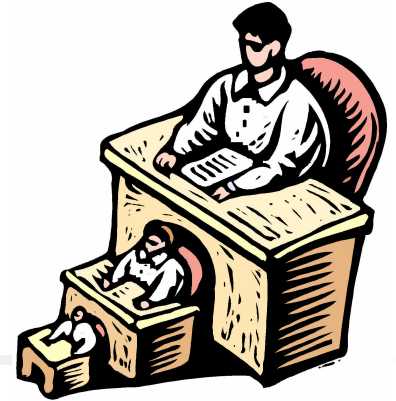

- **Ortho Evra** contraceptive "**sex patch**" released in 2002 has already been responsible for the deaths of 17 women. Information also revealed that 21 other "life-threatening" conditions were attributed to the patch, including blood clots, strokes and heart attacks. (LifeSite Daily News 09.04)

Dirty white lab coats

- Politically, abortion is not open to debate
- Planned Parenthood is well entrenched
 - “Pro-Choice” PP fights against informed consent
 - Current social ideals line right up nationally
- Cancer funding organizations \$\$\$ increasing as **cancer rates are on the rise**
- ★ Researchers fear for their reps and their **jobs**

Bureaucracy

- Information may be used as a tool of manipulation
- Some researchers fear
 - for their reputations
 - their jobs would be in jeopardy
 - **FUNDING WILL BE WITHHELD or LIMITED**

Some will not be silent

- Dr. Janet Daling **Study:**

"Risk of Breast Cancer Among Young Women: Relationship to Induced Abortion" (11/ 2/ issue: Journal of the National Cancer Institute)
(Fred Hutchinson Cancer Center, Seattle, WA.)

DALING STUDY

1,806 women in study

845 women with breast cancer

961 control group (no b/c)

Each Interview was **1 on 1** and **2 hours long**

- For abortion after age 30 Risk Increase: **110 percent**
- First abortion before 18 Risk Increase: **150 percent**
- First abortion after age 30 w/Family History Risk Increase:
(mother, sister, aunt) **270 percent**
- **12 women in the control group were diagnosed with breast cancer**
- **Nota Bene: This was a study of American women**

Science first

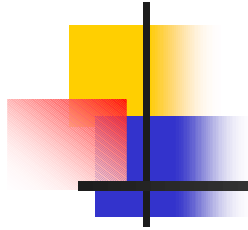

- Dr. Janet Daling is an abortion proponent whose ideology did not drive her research:
- "I have **three sisters with breast cancer** and **I resent people messing with the scientific data to further their own agenda, be they pro-choice or pro-life.** I would have loved to have found no association between breast cancer and abortion, **but our research is rock solid and our data is accurate.**"

[L.A. Daily News, Sept., 1997] [Abortion Breast Cancer Coalition]

When cancer comes knocking

There is no room for a political agenda!

The Abortion-Breast Cancer Link

The breast is an organ

- The mammary gland is the **only** organ that is **not fully developed** at birth
- From birth to puberty (first menstrual period) the breast is immature

In stages, the breast develops

- Stage 1: From puberty until pregnancy
- Stage 2: **At THE END OF pregnancy**
the breast finally matures

The breast is NOT mature until PREGNANCY occurs

- The sooner a woman's breasts mature the lower her risk of breast cancer
- Women who never experience pregnancy retain immature breasts
NO MATTER HOW OLD THEY ARE

Estrogen makes breasts grow

- **Estrogen is the most carcinogenic substance known to mankind**
 - **surpassing all other chemical carcinogens both physical and organic**
 - **its carcinogenic effect measured in parts per trillion**
- **Women start producing substantial estrogen at puberty**
- **Estrogen is a cause of breast cancer for women with type 1 and type 2 mammary lobules**
- **The longer women with type 1 and 2 lobules are exposed to their own estrogens, the greater their risk of developing breast cancer**

How does breast differentiation occur?

- Before puberty the first type of lobules form
- At puberty more estrogen causes growth of second type of lobules
- Pregnancy **dramatically increases estrogen** causing a dramatic growth of type 1 and type 2 lobules (often causing sore breasts)
- At 32 weeks of pregnancy, most type 1 and type 2 lobules are changed into the third and fourth type of lobules.
Think: **BROCCOLI FLORETS**
- Type 4 lobules are the milk producing cells
- Both type 3 and type 4 lobules are essentially immune to cancer

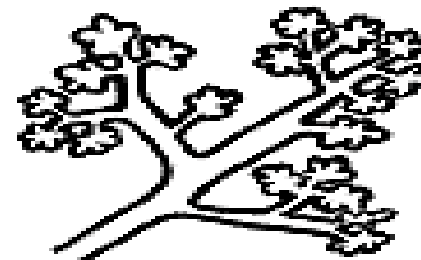

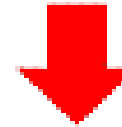

Types of Breast Lobules

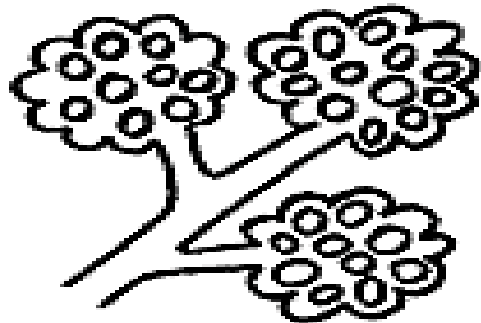

Type 1
Breast at birth

Type 2
Breast after puberty

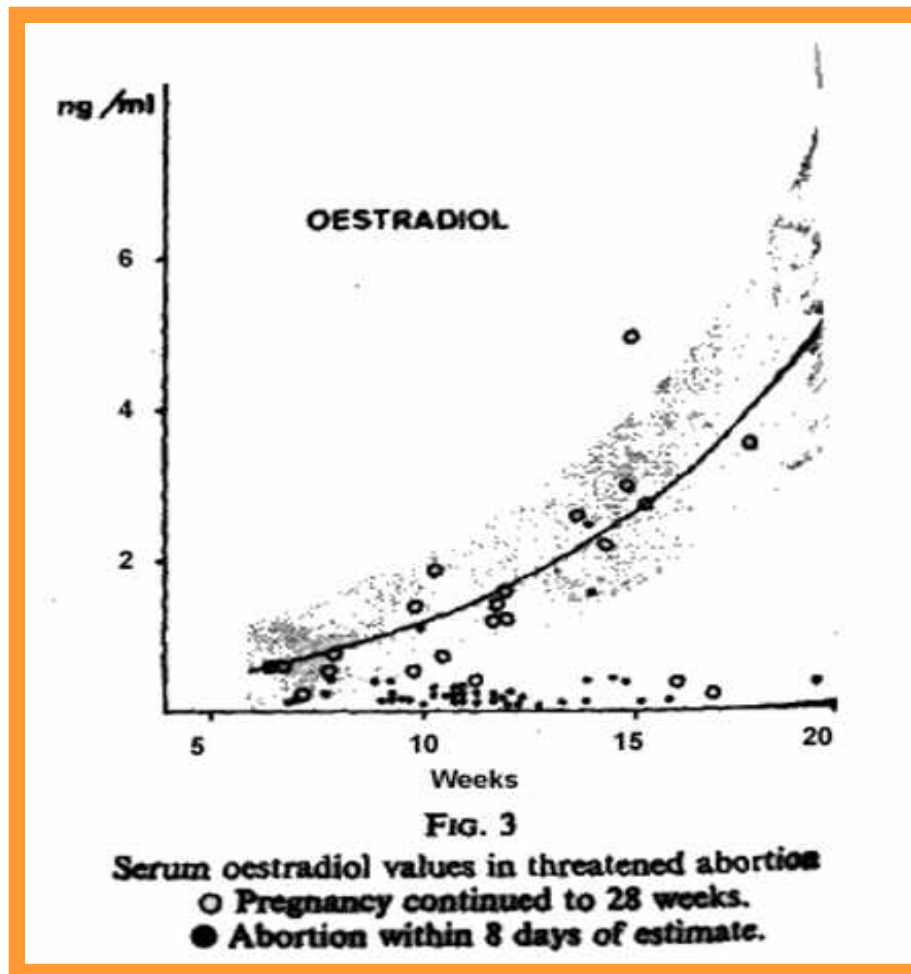

Type 3
Breast with pregnancy
after 32 weeks

Type 4
Breast with milk

Estrogen level rises DRAMATICALLY during pregnancy

Joel Brind, Baruch University

Effect of first full term pregnancy on risk

- A full term pregnancy **dramatically reduces lifetime breast cancer risk by changing the immature breast cells into mature ones**
- **The FIRST full term pregnancy has the greatest risk-reducing effect** since more type 1 and 2 lobules are present prior to this pregnancy than just before any following pregnancies

Subsequent pregnancies further reduce lifetime risk

- Approximately four full term pregnancies almost completely eliminates lifetime breast cancer risk due to the A-BC link
- **Reducing the time interval** from first menstruation until the first full term pregnancy also serves to limit overall lifetime risk
- Young adults should be PREPARED to marry EARLIER THAN OUR SOCIETY DICTATES

What is happening now?

- Children are encouraged to become TEENAGERS rather than ADULTS
- We see the results of that in our nation
- Later and later marriage
- We reap the results in Abortion, Fertility Issues, In vitro Fertilization and soon, Cloning
- **There is no such thing as a TEENAGER**

Early Reproduction and Marriage
Heartbeat International National Conference
Chicago, Spring 2005

We reap the results worldwide

- Promiscuity: the practice of Adultery
- Contraception: the practice of Abortion
- Late life fertility Issues
- In vitro Fertilization
- and soon, Cloning

Early Reproduction and Marriage
Heartbeat International National Conference
Chicago, Spring 2005

Epidemiological Studies

- **So many studies... since 1957**
 - 33 studies worldwide have shown a **95% confidence interval** for the effect of induced abortion on the entire population studied
 - Women who had at least **one abortion** were on average, **50% more likely to develop breast cancer**, and that one can be 95% certain that the increased risk is between 0% and 120%
 - 27 of the studies showed definite increased risk
 - **17 of these studies were statistically significant**

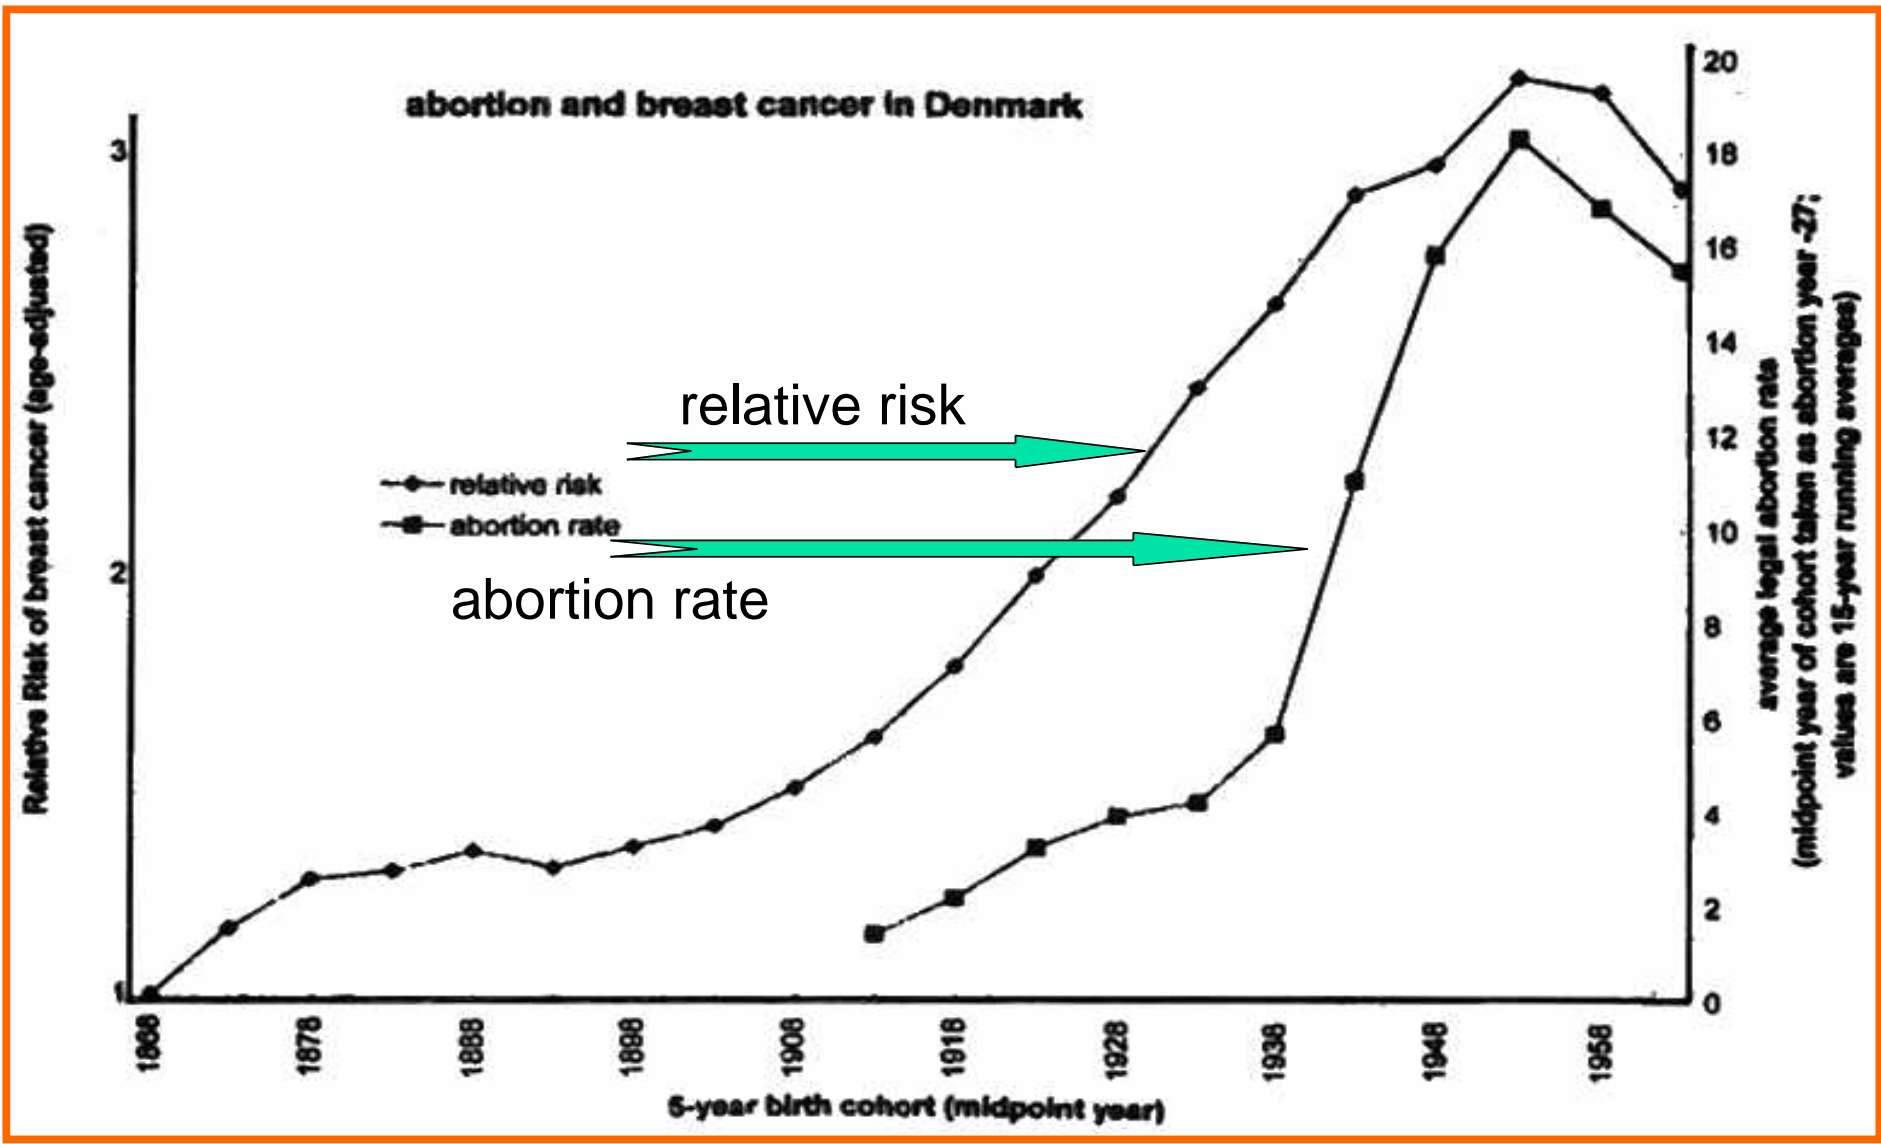

(Joel Brind, Ph.D; Professor of Human Biology and Endocrinology Baruch College, City University of New York)

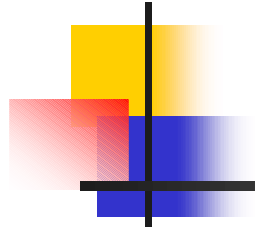

Abortion rates indicate breast cancer death rates

- British life insurance actuaries predict breast cancer deaths by following abortion rates (Patrick Carroll PAPRI, UK)
- 50 out of 50 studies show increase in pre-term births after abortion (Brent Rooney Vancouver B. C.)

50 out of **50**

• DENMARK

Moving towards prevention

Breast Cancer: Is DAMAGING

- One enters alone and is engulfed by devastation, loss and grief.
- I feel that my life, my femininity and my self-image were shattered, fragmented and reorganized.
- The breast cancer survivor, is often presented in public, well after her ordeal, when the reality of her pain has been dealt with and diminished.
- I am an ebullient, effervescent person by nature; it was unimaginable, as a woman of faith, to find myself so thoroughly depressed and disheartened.
- My support system was severely fragmented and attenuated.
(E. Silver-- Eve's Story)

I don't want any of you to experience that

Here's what you can do

- **OUT THE TRUTH:** Write letters to the editor of your newspaper: The public must be told and engaged in spreading the word about the Abortion-Breast Cancer Link and the **5 Medical Groups** that affirm the link
- Send e-mail alerts (Google Alerts: abortion, abortion-breast cancer link)
- Phone radio stations
- Tell your friends, colleagues and neighbors
- Keep informed, stay in touch

info@cintalatina.org

Organizations working to OUT the TRUTH:

- The Abortion-Breast Cancer Coalition
 - www.abortion-breastcancer.org
- The Breast Cancer Prevention Institute
 - www.bcpinstitute.org
- Cinta Latina Research
 - www.cintalatina.org

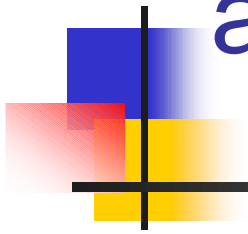

Summary

- There is important information about the lifetime abortion-breast cancer risks to women
- **Pink Money** Organizations claim concern for women's health but are silent about the significant studies and data on the abortion-breast cancer link
- The facts are clear and “rock-solid”
- The general public must be informed and pro-active for its own well-being
- This outline is available for immediate download at:
 - <http://www.evesilver.com/waco050310.pdf>
 - <http://www.evesilver.com/pinkmoney.pdf> (more detailed)

End

"...there is a highly visible difference between the pace of basic sciences and the application of new knowledge to human problems. It needs explaining."

Lewis Thomas

From
The Abortion Breast cancer Coalition

Endnotes (1)

- The Abortion/Breast Cancer Link: Support for the Evidence

- Physiological Evidence
- **Dr. Jose Russo, M.D. and Dr. Irma Russo, M. D.** (Fox Chase Cancer Center, PA)
- In 1980 Russo and Russo published the results of their study involving laboratory rats which **confirmed a relationship between abortion and increased risk of breast cancer.**
- [Russo & Russo (1980) Am J. Pathol 100:497-512].

- **Medical Groups Supporting Disclosure of Research:**
- **Association of American Physicians and Surgeons**
- 1601 N. Tucson Blvd., Suite 9
- Tucson, AZ 85716-3450
- 520-323-3110
- "The Association of American Physicians and Surgeons believes that patients have the right to give or withhold fully informed consent before undergoing medical treatment. This includes notification of potential adverse effects. **While there is a difference of medical opinion concerning the abortion breast cancer link, there is a considerable volume of evidence supporting this link, which is, moreover, highly plausible. We believe that a reasonable person would want to be informed of the existence of this evidence before making her decision.**"
- Jane Orient, MD
- Executive Director
- October 27, 2003

Endnotes (2)

- **Dr. Janet Daling's** 1994 study found an increased risk of 50% for the general population. It remains the only study specifically commissioned by the National Cancer Institute. [Janet R. Daling et al., "Risk of Breast Cancer Among Young Women: Relationship to Induced Abortion," 86 **Journal of the National Cancer Institute**; (1994);1584]
- Dr. Daling is an abortion supporter, but she did not allow her ideology get in the way of science. She said, "I have three sisters with breast cancer and I resent people messing with the scientific data to further their own agenda, be they pro-choice or pro-life. I would have loved to have found no association between breast cancer and abortion, but our research is rock solid and our data is accurate." [L.A. Daily News, Sept., 1997] [Abortion Breast Cancer Coalition]
- U. S. and World Medical Community Support of The Abortion Breast Cancer Link
- *National Physicians Center for Family Resources* <http://www.physicianscenter.org/>
- *American Association of Pro-Life Obstetricians and Gynecologists* <http://www.aaplog.org/>
- *The Polycarp Institute* <http://www.polycarp.org/>

Endnotes (3)

- **Dr. Janet Daling's** 1994 study found an increased risk of 50% for the general population. It remains the only study specifically commissioned by the National Cancer Institute. [Janet R. Daling et al., "Risk of Breast Cancer Among Young Women: Relationship to Induced Abortion," 86 **Journal of the National Cancer Institute**; (1994);1584]
- Dr. Daling is an abortion supporter, but she did not allow her ideology get in the way of science. She said, "I have three sisters with breast cancer and I resent people messing with the scientific data to further their own agenda, be they pro-choice or pro-life. Endnotes (4)

- Studies and Research Support
- **Breast Cancer Research Institute** (www.bcpinstitute.org)
- Joel Brind, Ph.D., "Abortion Now a "Risk Factor" According to Latest New England Journal Review, Abortion Breast Cancer Quarterly Update, Spring 2000, Vol. 4, No. 1

- **New England Journal of Medicine**
- The Melbye study has been severely criticized for its errors by both the Brind-Penn State team and Senghas and Dolan." [(1997)New Engl J Med 336:1834] "However, even Melbye reported within the body of the study that: '[w]ith each one-week increase in the gestational age of the fetus . . . there was a 3 percent increase in the risk of breast cancer.'" [Melbye et al. (1997) New Engl J Med 336:83]

- **The World Health Organization** published its study in 1970 and said that the results "suggested increased risk associated with abortion -- contrary to the reduction in risk associated with full-term births." [MacMahon B, et al. Bull Wld Health Org (1970); 43-209-21].

Endnotes (5)

- **News From the Abortion Breast Cancer Coalition (ABCC)**
- Web-site: www.abortionbreastcancer.com
- On March 13, 2000 **The Royal College of Obstetricians and Gynecologists** became the world's first medical organization to warn its abortion providers that the abortion-breast cancer link "cannot be disregarded" and that a 1996 review of the worldwide studies done by Dr. Joel Brind, President of the Breast Cancer Prevention Institute, was "carefully conducted" and "had no major methodological shortcomings." ["Evidence-based Guideline No. 7: The Care of Women Requesting Induced Abortion," Royal College of Obstetricians and Gynecologists, Press Conference, March 13, 2000.]
- Mrs. Karen Malec, President of ABCC, said "Now that **27 out of 33 worldwide studies have reported a link between abortion and breast cancer (13 out of 14 of which are American studies reporting a link)** and 43 years since the first study, the New England Journal of Medicine has finally chosen to recognize the overwhelming evidence of an abortion-breast cancer link."
